

Fluxy pricelist Oct '11

Our pricing structure includes everything and is based on a 'standard' installation, there are no hidden costs or unexpected expenses incurred within this standard installation which include-

Civil works :

Foundation excavation in firm clay on reasonably level ground (allowable bearing pressure 100Kn)

Cable trenching and 50m cable run, cable and conduit included

Reinforced concrete pad and holding down bolts

Within 25km radius of Rathnew

Electrical -

Installation of modular system comprising control circuitry, inverter, rectifier, resistive load, earthing etc

Installed by our engineers in a house, dry garage or outbuilding

Electricians sign off

Tower installation-

Custom made 4 piece hydraulically lifted monopole to lift turbine to 13m (residential) or 20m (commercial)

All bolting, lightening protection, tower cabling and safety cut off switch

Turbine-

Fluxy 5.5m diameter fully mechanical turbine

Fluxy 13m	€ 22,907	Including VAT at 13.5%	€ 26,000
Fluxy 20m	€ 25,550	Including VAT at 13.5%	€ 29,000

Potential expenses incurred outside of 'standard' installation-

Extra cable run: per 10m € 150

Alternate concrete pad (boggy ground, rock etc) priced after site inspection

Special Paint, complete wind turbine and tower (Note: standard green at no charge) € 800

Export crating for turbine and blades (tower sections not crated) € 800

Waterproof cabinet, where no dry building is available to install within, incl foundation € 900

Yearly maintenance cost-

Airfoil cleaning, bearing lubrication, brush adjustment, statistics check € 250

(this yearly charge is built in to any payback calculations)
